X8

Full face mask

Silicone body, class 2

Compiles with EN 136

Lightweight and super comfortable

A two-filter full-face silicone mask of the **X8** series consists of a body, a large panoramic visor with peripheral vision, two durable bayonet connectors with inhalation valves and seals and head bands. The mask's construction allows to complete it with elements removing harmful substances in aerosol form (dust, smoke, mist), in form of vapours and gases or both these forms together. Relatively low weight of the **X8** series mask and double connectors for attaching it to the cleaning elements increase the work efficiency. Series **X8** respirators are available in sizes M and L.

Resistant to damage

The **X8** series mask visor is scratch and fog resistant. The panoramic face shield polycarbonate visor maximises light inside the mask and provides optimum visibility while protecting against impact. Head harnesses with 4-point attachment ensure a perfect seal and a stable working position.

The full face mask series **X8** can be used with filters T-BM P2 R, T-BM A P2 R, T-BM P3 R, T-BM A P3 R, X2000-AG P3 R, capsule filters X793 P3 R, X793C AP3 R, filter absorbers X701 A1, X702 A1E1, X703 ABEK1 and X70523 A2P3 R D, X70923 A1E1 P3 R D, X70926 ABEK1 P3 R D

Restrictions and storage

Do not use in an environment where the oxygen concentration is less than 19.5% and in the presence of unknown gases. Store in the original packaging with instructions, without any purifying components connected, at temperatures from -20°C to +30°C and humidity RH<80%. Protect from direct sunlight.

Packaging

Net weight of mask ≈ 414 g
Unit packaging dimensions: 250/210/150 mm
Dimensions of master carton:: 280/425/315 mm
Number of masks in a master carton: 4 pcs.
