T-BM A P3 R

With bayonet connector

PURPOSE

T-BM A P3 R filters, after being assembled with two-filters half mask or full face mask with a suitable bayonet fitting, protect the respiratory system against particulate aerosols (dusts, fumes) or water-based aerosols (fogs), if the concentration of the dispersed phase of the aerosol does not exceed 30 x OEL in the case of completing with halfmask and does not exceed 1000 x OEL in the case of completing with full face mask.

The filter additionally protects against fetors and unpleasant odours as well as irritating effects of aerosols and vapours of organic substances. This enables the use of protective equipment equipped with T-BM A P3 R filters in an atmosphere contaminated with organic substances, provided that their concentration does not exceed the OEL value.

Filters can be used, for example, with the following half-masks and masks:

- Half mask X6 from the OxyPro Series
- Half mask X7 from the OxyPro Series,
- X8 half mask in OxyPro Series
- other half masks and respirators with compatible bayonet connector

DESIGNATIONS

VENT EMKA T-BM A – product name
P3 – filter class according to EN 143: 2000
R – reusable filter in accordance with EN 143: 2000 / A1: 2006

 – a pictogram informing about the method of connecting the filter to the face part

RECOMMENDATIONS AND LIMITATIONS IN APPLICATION

1. It is prohibited to use filters in an atmosphere with an oxygen content below 17% vol.
2. It should not be used in spaces with limited cubic volume, in particular non-ventilated spaces, such as sewers, wells,tanks, etc.
3. Filters may only be used in accordance with the operating instructions.
4. Also read the instructions for use of the half-mask or mask to which they were applied.
5. Filters may only be used in accordance with the operating instructions.

MOUNTING INSTRUCTIONS

1. Nehmen Sie die Filter aus der Verpackung.
2. Verbinden Sie den Filter mit der Halb- oder Vollmaske, so dass die Größe der Bajonethaken an der Maske der Größe der Löcher am Filterhaken entspricht.
3. Ganz im Uhrzeigersinn drehen.

PACKING AND STORAGE

Packing - 2 pcs into a transparent plastic bag. Instructions for use are included in the package. The filters should be stored in the factory packaging (foil, bulk carton) in dry conditions, ensuring a temperature of -5°C to +40°C and relative humidity of approx. 80%.

DURABILITY

The manufacturer guarantees that the functional parameters of the filter will be maintained for a period of 5 years from the date of production, if the product is stored in a factory packaging.
The expiration date is on the product.

CERTIFICATION AND STANDARDS

UE/557/2021/1437 issued on 16.03.2021
by CIOP - PIB - notified body No 1437
EN 143:2000/A1:2006
